[35% of all respondents/53% of Republicans/17% of Democrats responded "zero"]

Some people think that one way to address global warming and to punish countries like China at the same time is to tax imported goods based on the amount of energy it takes to make those goods.

Others oppose these taxes because the price will ultimately be paid by American families and workers in the form of higher prices for energy and everything made or transported using energy.

In general, do you support or oppose these taxes?
